How and why you should never pay a speeding fine or parking ticket again!

Welcome to Aussie Speeding Fines and thank you for your interest.

This report will show you the key reasons why you should never pay a speeding fine or parking ticket again. We will outline the problems with the current system and will show you how, by you not paying your fines, it will help us introduce a fairer and more effective system for all road users in Australia.

We will also share with you some of the strategies that you will need to use to actually get out of paying a speeding fine, and we encourage you to become a member and receive a copy of our 84 page e-book “Speeding Fines – What you REALLY need to know!” to find out more.

So, let’s begin …..

In essence, the current system is NOT fair to all motorists and does NOT work. The road toll has NOT been significantly reduced since the introduction of speed detection devices, and all that has REALLY happened is that the government coffers have become much fatter and we have blindly been funding government projects NOT associated with road safety.

The Australian government currently earns in excess of $3,000,000 a day – that’s over $1 BILLION a year! Now, with that kind of money you would expect that we would have the safest roads in the world and a road toll of next to nothing but, that is clearly NOT the case.

As a very quick introduction to what we are trying to achieve through our website www.aussiespeedingfines.com, we would like to see safer roads being built and a far more in-depth driver training program introduced BEFORE people are presented with a Driver’s Licence. We would then like to introduce a system that actually REWARDS drivers for taking the initiative and completing advanced driver courses and actually becoming SAFER drivers.
Now, this is just a VERY quick introduction to the very detailed system that we would like to see implemented. If you would like to read more about our overall plan, please click here to be taken to the Vision for the Future link on our website.

The simple truth is that the Commonwealth government and various State governments are not the slightest bit interested in hearing our proposals because this would cause them to lose hundreds of millions of dollars in illegal speeding fine revenue. And, as with most large organisations, the ONLY way we are going to get them to listen to us is by hitting them where it hurts, in their back pocket.

This is why we urge EVERY motorist in Australia to purchase a copy of our e-book and follow the very simple, step-by-step processes that we outline and STOP paying these illegal fines and stop the money simply pouring into the government coffers. Instead, by NOT paying these fines, the government will LOSE millions of dollars in revenue and will be FORCED to listen to the suggestions that we have, which will actually create far safer roads for ALL Australians.

We have mentioned “illegal fines” a number of times now because that is EXACTLY what they are. The police and other agencies involved in collecting revenue from speed detection devices will quote rules and regulations that are NOT actually law. The various State parliaments have NEVER seen these “documents” (supposed acts and laws – Road Rules) let alone ratified them as law. We go into great detail in our e-book “Speeding Fines – What you REALLY need to know!” and actually refer to the specific laws in question and break them right down to the very words used, and show you that the ways in which the laws are actually written actually explains why they are NOT law! Please click here to become a member and order your copy of our e-book now.

Did you know that not a single speed detection device that is currently used in Australia complies with the requisite Federal legislation? We explain in depth what Section 10 of the National Measurement Act is and how it relates to all the speed detection devices that are currently used in Australia. Because we refer to Federal legislation, it means that no matter what state of Australia you live in, our strategies will work for YOU!
Not only that but the ways in which the devices are being used is incorrect and illegal. Did you know that each State issued a set of Police Guidelines for the use of all speed detection devices – speed cameras, radar and laser - yet these devices are rarely, if EVER, used in accordance with these guidelines?

We have included wording from the actual police training manuals for these speed detection devices in our e-book, and we show you that the manuals themselves CLEARLY state that these devices are not accurate and must be used in VERY specific ways (ways that the current users are simply NOT following).

So, the police are using devices that are inaccurate, they are using the devices incorrectly, and the laws that they are using to justify the use of these devices are not actually law – but wait, there’s more.

The biggest piece of this deceptive puzzle lies with the insurance companies. They try and tell you that speeding causes more accidents – which has NEVER been proven (in fact, we provide statistics on our website that prove that this is NOT the case) – and therefore they justify charging you inflated insurance prices, or not offering you insurance at all, just because you have been ILLEGALLY and incorrectly issued with a few speeding fines. Now, if that’s not discrimination, we don’t know what is.

But, how’s this? Every insurance company will FORCE you to sign a release form which states that, in the event of a claim, you give them permission to do a licence check, which includes them having access to information relating to ANY speeding fines that you have received. Then, if you have failed to tell them of even one single speeding fine, they can say that you have breached your Duty of Disclosure and therefore they do not have to honour your claim.

So, in simple terms, you HAVE to tell your insurance company EVERY time you get a speeding fine: if you don’t, you may not be covered in the event of an accident. BUT, if you DO tell them, then they have a right to charge you MORE for your cover or to DENY you cover from that time on.
Now, as we explained before, the current speed detection devices being used in Australia have been PROVEN to be inaccurate. It has been PROVEN that they are often NOT used in accordance with the guidelines surrounding their use, AND they do NOT meet Federal requirements.

So, what do you think the chances are that mistakes are made because of false, incorrect and illegal readings from these devices that, in turn, GREATLY affect everyday motorists – even those who ALWAYS drive BELOW the limit?

Don’t think it can happen to you? Go back to our website www.aussiespeedingfines.com and read the quote in the middle of the Home page from one of our clients. This is REAL, and it affects real people, in one way or another, on a daily basis.

Also, please go to our on-line petition page here and read the statistics that prove that speed and red-light cameras actually INCREASE accidents! Yes, we’re aware that this may sound like a crazy claim, but please, read the facts for yourself before you decide.

And, just quickly, in relation to parking fines, ALL roads in Australia were created in what is called “fee simple”. This means that you cannot be charged to use these roads, and that INCLUDES parking on the side of them. As a quick aside to this, it also relates to charging tolls to use roads, as well.

On top of that, there is NO allowance in the Commonwealth Constitution or in any State Constitution for councils. Therefore, if councils are NOT part of our government body, then why are they issuing parking fines? We actually have a complete chapter in our e-book solely dedicated to parking fines.

Okay. So now you know WHY you should never pay a speeding fine or parking ticket again, so HOW do you do that?

Well, the simple answer is to just stop paying the fines. Do NOT just buy into the governments’ scare tactics where they send you out an official looking Infringement Notice and frighten you into simply paying.
The next option is to object, and to ask the agency concerned (Police, speed camera operators, parking officials, etc.) to PROVE their claim against you. We go into great DETAIL in our e-book and explain EXACTLY what you need to ask and exactly HOW to ask the right way, so that you never have to pay one of these illegal fines again.

We show you how to fill up the governments’ time by asking completely fair and relevant questions and then, if you still don’t get the response that you’re after, then we show you how to have your matter listed in court and then take up the courts’ time as well.

Finally, we show you how to take your matter to court, to stand up for your rights, and take a stand on principle (something that more and more people are choosing to do as they become aware of all of this information). We explain step-by-step, precisely what you need to say and not say, from the moment you enter a courtroom. It is this final strategy that will ultimately cause the government to break and listen to us, because there will come a point when the courts simply cannot hear that many cases, and the government cannot deny you your right to have a matter heard in court if you request to do so.

Many people think that it’s too hard, or costs too much money, to have their case heard in court, and this is simply not true. In fact, the reality is that all of these fines are simply ALLEGED offences so, if you don’t agree with them, then you have EVERY right as a citizen of Australia to voice your objection and have the matter heard, simply and at NO cost to you, for an objective opinion and result to be given.

Also, be aware that, even if you were to lose in court – which should never happen if you apply our information correctly - they cannot charge you any more because of a simple two-line provision in the Covenant on Civil and Political Rights. So, you have nothing to lose by fighting back!

So, hopefully after digesting all this information, you can CLEARLY see why you should never pay a speeding fine again and hopefully, we have also shared with you some of the principles of how to avoid paying your next speeding fine or parking ticket. If you want to know more, please click here to become a member and order your copy of our 84 page e-book, and we will show you step-by-step EXACTLY what you need to do.
We are always available by e-mail to help you with any questions you might have, and you are welcome to click here and read over our Testimonials page to see how valuable our current clients have found our information to be. Please note that this page is updated almost every month because that’s how many reports we get back from members who have been successful with our strategies.

Otherwise, please become a member now to receive your copy of our 84 page e-book “Speeding Fines – What you REALLY need to know!” and remember we offer a full 30 day, no questions asked, money back guarantee so you have nothing to lose by ordering – as opposed to losing demerit points, and possibly your licence, if you don’t!

Thanks again for your time, and may you enjoy many years of safe and enjoyable motoring,

The Team at Aussie Speeding Fines.

P.S. Please feel free to pass this report on to anyone you know you drives in Australia, because every driver in this country today will benefit from our information.
